As a 100% domestically owned Hungarian retail and wholesale company, we offer to our partners since 1993 customized solutions for gas, water and heating systems, as well as for sanitary ware and tiles, also solutions for renewable energy, heat pumps, air conditioning and water purifiers.
History

Szerelvénybolt Ltd. is an independent family business, which was founded in 1993 in Kecskemét, in the heart of Hungary. In 1998 we became wholesalers, and in the next year we could already welcome our customers in our new store. Since then we opened new stores in Budapest and Budaörs, and in 2015 we launched our webshop, which is under constant development.

Today we are operating 8 stores, on an area of more than 19,000 square meters occupied by warehouses and stores in Budapest, in the 10th, 18th and 23rd district, Soroksár, Budaörs, Dunakeszi, Kecskemét Győr and also in Debrecen. In May 2018 a new central office and logistics warehouse of 3,400 m² was established in Budapest, in the 18th district, in the Airport City Logistic Park.

8 stores in the country

19 000 m² warehouse and store

150 employees
Retail

The main product categories offered through our retail sales channels are the following: **product groups relating to building engineering and sanitary ware for bathrooms**. We are one of the largest building engineering traders in Hungary; we offer more than **200 brands, and we supply more than 30,000 building engineering products** from stock to our construction partners and retail customers.

In addition to the fact that we always offer quality products, it is extremely important for us to assist our clients by giving them **professional advice** so that they can make the best decisions. For all this, our large, **frequented showrooms and competent, professional colleagues** will also be available in 2022, the year of the renovations.

Offers for Installation Service Providers

Our company pays special attention in providing trainings and opportunities for development for our network of installation service providers and constructors. Therefore, we regularly organize different activities for the suppliers, such as factory visits, working breakfasts for nearly a thousand active installation service provider partners.

We also try to serve their needs from the www.mester.szerelvenybolt.hu webshop, where we are waiting for them with personalized customer management, continuous promotions and delivery options.

mester.szerelvenybolt.hu
Project

Colleagues working in this field devote great attention to supporting larger investments, projects and execution of works. We strive to assist our partners through on-site consultations, product placements, continuous technical support, to support our long-term cooperations with flexible customer management, service of individual needs, special prices, and financing.

Project department’s e-mail: projekt@szerelvenybolt.hu
Wholesale

Our wholesale activity plays a decisive role among resellers in Hungary. Thanks to the decades of experience in this field, and due to our reliability and flexibility, we are currently the main supplier of nearly 300 resellers.

In recent years, we have made significant improvements to provide faster and more flexible service, communication and collaboration. In 2019, the IT development of our wholesale sales channel, the introduction of a barcode warehousing system, the establishment and operation of a logistics center, and the expansion of the truck fleet provided us with further growth opportunities.

Webshop

Our szerelvenybolt.hu webshop sales show a continuously, year-on-year increasing trend, which poses continuous development challenges for our company. We consider our webshop sales channel as our company’s 9th store. Our live online customer service helps customers through the built-in chat feature.

We serve our wholesale partners and resellers not only in our logistics center, but also in our nagyker.szerelvenybolt.hu webshop specifically for them, so that they can obtain the necessary goods online.

Our mester.szerelvenybolt.hu webshop, designed for craftsmen, installers and contractors, makes the procurement of goods necessary for everyday work simpler and more convenient. Our contracted partners can buy with individual discounts in our mester.szerelvenybolt.hu webshop.

# Dealership

In addition to performing the traditional reseller activities, we created three exclusive brand trade networks (HakaGerodur – Switzerland, Effebi – Italy, Install). The networks are strengthened by dedicated resellers and our own sales staff working with the three brands separately and providing support for the network.

This includes technical support, organization of trainings, regular partners’ visits, spring and autumn “road-shows” and factory visits. We created a website for each of the brands, so the informations of the products and the dealers’ contact details are available for the customers too.

In addition to the distribution of our building services products, our company appears on the Hungarian building materials market in 2021 under the brand name SIXBAU with a new, innovative construction system.

With our SIXBAU brand, our main goal is to introduce and disseminate our outstandingly energy-efficient construction technology, which can be used to build modern, economical and healthy homes throughout the country. Our complex lightweight concrete construction system provides faster-than-usual construction, typically with less live labor requirements and more economically.

SIXBAU polystyrene lightweight concrete

Our construction technology is based on special polystyrene concrete, which is a good thermal insulator, durable, light and easy to form. It is a building material with many advantageous properties, from which we manufacture and distribute masonry elements, partitions and building boards under the SIXBAU brand.

sixbau.hu
SIXBAU gBlock masonry units

Using our SIXBAU gBlock lightweight concrete masonry units, solid load-bearing and frame-filling wall structures can be built that are able to meet the latest thermal regulations on their own. They are larger in size compared to other bricks and therefore allow much faster construction. As they do not require the use of additional thermal insulation, they can be used to build buildings that provide a higher level of comfort at a lower cost.

Fire classification: Not flammable, A2 - s1, d0

SIXBAU gWall partitions

Our SIXBAU gWall lightweight precast concrete partitions are made of three meters in length and in various thicknesses with groove-edge design. Due to their low weight, they do not require a separate primer and most of the time the use of bridges. GWall partitions can be well plastered and tiled directly with other wall coverings. Tubes that are not sensitive to moisture should not cause damage to them, and due to their compact and homogeneous material structure, rodents, insects and other pests do not typically move into them.

Fire classification: Not flammable, A2 - s1, d0

SIXBAU gPanel building boards

SIXBAU gPanel building boards are low-weight, universally applicable products, easy to machine, easy to shape and combine well with most construction materials. They are suitable for making masonry, as an internal formwork element, for apartment and bathroom renovations, for installation in bathtubs, and for subsequent thermal insulation. They are also excellent for plastering gutters, facade decorations and stucco.

sixbau.hu
SIXBAU Roof structures

Our prefabricated slab roof structures offer a fast and perfect solution with a guarantee of uncompromising quality and can be assembled in even a single day, thus significantly reducing construction time and costs. Our roof structures are space-saving, durable and can be built very quickly. Since the angled roof structure also includes the floor structure, the saved reinforced concrete floor as well as the internal load-bearing walls result in significant cost savings.

SIXBAU Deck slabs

Our SIXBAU Deck slabs are lightweight structural slabs made of wood or steel beams, which can be used well in new buildings, building renovations and floor extensions. They can also be used in the construction of larger horizontal partitions, mezzanine ceilings, galleries or in the replacement of wooden ceilings in old buildings. The low self-weight of SIXBAU slabs means minimal extra load on the existing masonry, half their weight and a third of the weight of concrete slabs. They can be built quickly and easily, no need for cranes, formworks, supports.

ÉMSZ membership

Our company is a member of the Hungarian Association of Building Insulators, Roofers, Tinsmiths and Carpenters, as well as the Hungarian Fire Protection Association. As a member of ÉMSZ, in addition to the guaranteed quality of our lightweight concrete building materials and corner roof structures, we are happy to pass on our professional knowledge and expertise to all professionals working in the construction industry.

We help where we can:

As a regular supporter of UNICEF, we help those in need.

There are pet-friendly stores, where we assure fresh water to the little pets.

We received the"Award for Community Service"in 2009 from the Karol Wojtyla Friendship Center in Kecskemét for our assistance in maintaining the center and contributing to providing meals for the residents.

We earned a certificate of honor for our contribution in building a landing site for the rescue helicopter at the hospital of Bács-Kiskun county municipality.
Social media

We actively communicate with our followers not only in our stores with the help of our qualified colleagues, but also on our social media platforms. The number of our followers is constantly growing, it is now over 327,000. You can follow us on Facebook, Instagram, Youtube and LinkedIn. On our Youtube channel you can watch our regularly updated product videos, consultation sessions and TV show appearances.

Press releases

In addition to our outstanding social media activity, we regularly appear in the domestic specialized, economic and general press on professional topics.

Our services

Consulting: We provide consulting services for our customers in our stores in connection with building engineering.

Home delivery: Orders placed at www.szerelvenybolt.hu are delivered anywhere in Hungary

Drawing up a list of materials: Based on a blueprint of your future house or apartment, we will make an estimate of the materials and devices you will need with a 90% accuracy. (It does not replace the building engineering plan.)

Future

The core value of Szerelvénybolt Kft. is fair business conduct. We believe that without innovation there is no future, no quality of life, and no environmental sustainability. Innovative solutions provide mobility, so we are able to adapt to the continuously changing environment.

One of our main visions is to be among the leading companies in the Hungarian building engineering market within two or three years.
